EDUCATION

University of Michigan, Stephen M. Ross School of Business <i>Master of Business Administration (MBA) • Focus on Data Analytics and Revenue Operations</i>	Ann Arbor, MI, USA 2022 – 2024
The London School of Economics and Political Science <i>Executive Coursework in Economics, Markets, and Public Policy</i>	London, UK 2024
Indian Institute of Technology (IIT) <i>Bachelor of Technology (B.Tech) in Computer Science Engineering</i>	India 2010 – 2014

MARKETING OPERATIONS & SYSTEMS ARCHITECTURE EXPERIENCE

Senior Marketing Technology & AI Systems Architect <i>San Francisco, CA, USA</i>	AWS 2024 – Present
• Systematized operations using Unstructured Text Intelligent Document Processing (IDP) Pipelines for AI Ops inside project management systems (ClickUp / Notion), compressing cross-functional latency by 27%. • Constructed the High-Volume Supply Chain Data Velocity & Quality Assurance (Amazon Vendor Central) platform to optimize database consistency, build automated analytics, and resolve operational ingestion bottlenecks. • Built and maintained a central library of corporate process guidelines, SOPs, and technical documentation covering workflows for transnational marketing, campaign operations, and data streams. • Maintained data tracking accuracy across our marketing stack, partnering with technical vendors and engineering pods to support platform evolutions and ensure complete cross-channel compliance.	

MBA Revenue Operations (RevOps) Intern <i>Tokyo, Japan</i>	Rakuten 2023
• Architected a centralized Unified RevOps Engine to orchestrate global go-to-market workflows, successfully centralizing intakes and eliminating manual data bottlenecks between sales, marketing, and operations. • Constructed comprehensive business reporting frameworks and dashboards via Power BI / QlikSense to translate performance data across channels, surfacing insights to support leadership decision-making. • Integrated complex Customer Data Platforms (CDPs) with a custom automated predictive lead scoring system, engineering frictionless routing pipelines, managing unstructured metadata schemas, and compressing reporting latency.	

Marketing Operations & Data Infrastructure Specialist <i>Redmond, WA, USA</i>	Microsoft 2020 – 2022
• Architected a secure Cross-Border FinTech Data Compliance cloud framework satisfying international GDPR and regulatory parameters, enforcing rigorous data governance across multi-region database boundaries. • Managed tracking accuracy across large product catalogs and multi-category enterprise commerce sites, implementing automated cross-platform data mapping and metadata sync procedures. • Led end-to-end change management initiatives to simplify digital tool landscapes, ensuring seamless alignment between campaign launches, corporate solutions, and first-party cookie compliance.	

Marketing Analytics & MarTech Infrastructure Specialist <i>New York, NY & Hyderabad, India</i>	The D. E. Shaw Group 2016 – 2020
• Formulated a behavioral telemetry data loop using advanced predictive modeling to monitor customer churn risks, optimize marketing automation workflows, and preserve recurring portfolio revenue layers. • Published a peer-reviewed deep learning paper in Elsevier's Journal of Cleaner Production (achieving 159 citations), validating technical expertise in predictive data engineering. • Authored 5 highly-technical software engineering textbooks detailing system design patterns, distributed frameworks, and data architecture layouts to guide engineering workflow standardization.	

Business Analyst – Enterprise BI Infrastructure <i>London, UK</i>	McKinsey & Company 2014 – 2016
• Re-engineered core supply chain data velocity and quality assurance reporting infrastructure for international organizations, automating manual data tracking patterns from hours to minutes. • Designed clean data visualization layers and business intelligence analytics environments to streamline cross-functional reporting across fragmented enterprise technology pipelines.	

CORE COMPETENCIES MATRIX

Marketing Operations:	Workflow Automation (ClickUp / Notion / HubSpot), SOP Centralization, Process Orchestration, Intake Pipeline Synchronization, Audit Log Architectures, Structural Delivery Governance.
Analytics & Tech Systems:	Power BI, QlikSense, Skywise Systems, Customer Data Platforms (CDPs), Alternative Credit Scoring Architectures, Predictive Telemetry Pipelines, GDPR / Cross-Border Data Governance.
